

TRACE HEATING

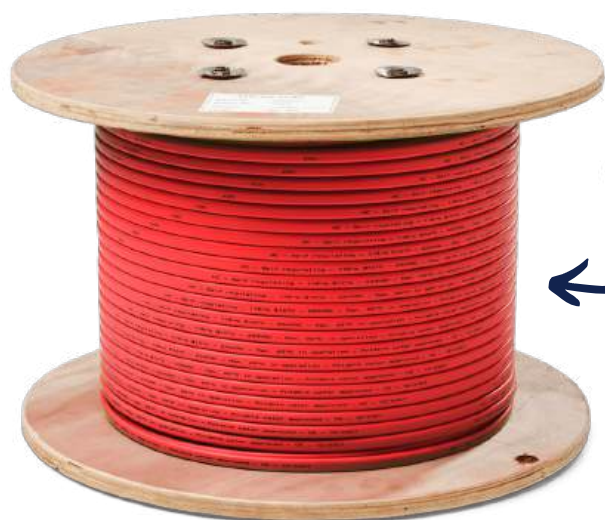

THE PERFECT FROST PROTECTION SOLUTION...

...with the EW Group Trace Heating Cable!

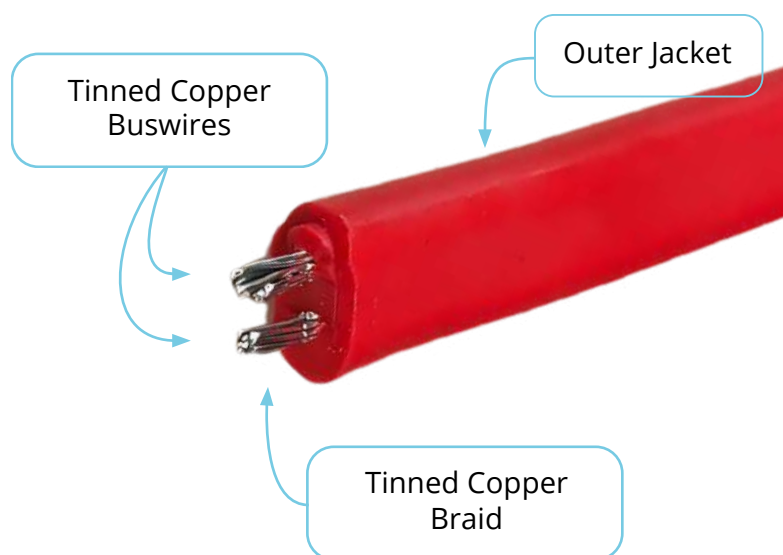

Our FH Mico/FHF heating tapes offer constant heat output, ensuring reliable frost protection and temperature maintenance for pipework, tanks, and vessels. With a robust outer jacket, these tapes are built to withstand tough industrial environments, providing dependable performance in even the harshest conditions.

Key Features

- Parallel resistance circuit along the length of the heating unit.
- Durable outer protection
- Energy-efficient performance
- Consistent heat distribution

Imprint your company detail!

- Rapid heating response
- Long-lasting reliability
- Easy installation process
- Versatile applications

Available in 10 w/m, 110V and 230V cut to length per 300m drum.

ACCESSORIES

Upgrade your **Trace Heating system** with essential accessories. From **thermostats** to **junction boxes**, our range streamlines installation, **enhances performance**, and protects your investment.

Trace Thermostat

Part Code: TRACESTAT

- UV protected case
- Designed specifically to be used frost protection applications
- Temperatures between -5°C and 40°C

Trace Splice Kit

Part Code: TRACESPLICE

- Suitable for self-regulating cable
- Easy to use with user-friendly instructions included
- Convenient all-in-one kit

Warning Label

Part Code: TRACEWARNLAB

Serving as a clear indication of the presence of heated pipes, mitigating potential hazards and enhancing overall awareness.

Fixing Tape

Part Code: TRACEFIXTAPE

Offering a reliable solution for attaching heating cables and thermostat sensors to pipes - providing versatility in various applications.
